

Amy Berliner an advocate and Healthcare Diplomat of Medical & Clinical Cannabis Research while integrating Blockchain Technologies. Berliner is an iconic figure among Entrepreneurs and Executives with an interest in this subject, Berliner is the ultimate “diplomat” concerning the industries integration Science of Technology, Education and Research: Intelligent and wise, while both eloquent and persuasive, she conveys the importance of this matter with a balance of passion and professionalism.

As Founder/CEO of [Aegis Biotech](#), Berliner applies more than two decades of Senior Executive experience to the benefit of her company and to her research, and development team. Her expertise, which includes senior-level positions as CEO/COO/CMO in Manufacturing, R&D, Healthcare digital health, Blockchain Technology. has given her the insight necessary to succeed. Berliner has managed from startup to \$22M dollar companies to M&A.

Berliner discovered she had Melanoma after a layoff in 2012 that forever pivoted her life and career, merging her background in Strategic Business Management, Health Sciences and mHealth technology. This became the impetus for the launch of Aegis Biotech.

Studies:

From her studies at the University of Maryland and LSU affiliate of LLU in Psychology and Business Management, to her enrollment in the Medical Cannabis Institute for continuing education for Clinicians, developed by the Society of Cannabis Clinicians (SCC), this is the first comprehensive CME-certified curriculum in Clinical Cannabinoid Medicine designed to educate the practicing clinician on both the research and clinical practice aspects of the therapeutic use of cannabis.

Amy became Certified in the study, science and research behind medical and clinical applications of medical Cannabis in October of 2013, Post Graduate Institute for Medicine.

- The Endocannabinoid System
- Basic Cannabis Ethnobotany
- Pharmacology of Cannabis and Physiologic Effects of Phytocannabinoid
- Delivery and Dosage of Medicinal Cannabis
- Clinical Practice I: Cannabis Use for Pain
- Clinical Practice II: Insomnia, Glaucoma, and Immune Disorders
- Clinical Practice III: Movement Disorders and Neurodegenerative Diseases
- Clinical Practice IV: Mental Health Conditions and Potential Psychiatric Applications
- Clinical Practice V: Cancer and Palliative Care
- Clinical Practice VI: Cannabis Use Disorders and Precautions
- Clinical Case Study Reviews

Introduction to 20th Century Cannabinoid Chemistry

Amy enrolled in early 2014 with Trinity School of Natural Medicine in study towards her ND in Naturopathic Medicine. Amy has since focused on her business and has not completed the remaining six months required to finish due to her focus on her company.

Amy is fluent in the education, science, research and technology involving alternative and traditional medical research, as well as work flow systems within digital health.

Amy is a dynamic networker and business strategist. She is a profound thought leader and speaker – with the ability to know, and the strength to do, what is necessary for Aegis Biotech to continue to be at the forefront of education, innovation, technology, and research.
